How to maximise your returns?

By Staying Invested

If You Invest, ₹15,000 Per Month @ 15% Per Annum,

15 Years

₹ 1 Crore

30 Years

₹ 10 Crore

This shows that Time in the market is more important than Timing the market.

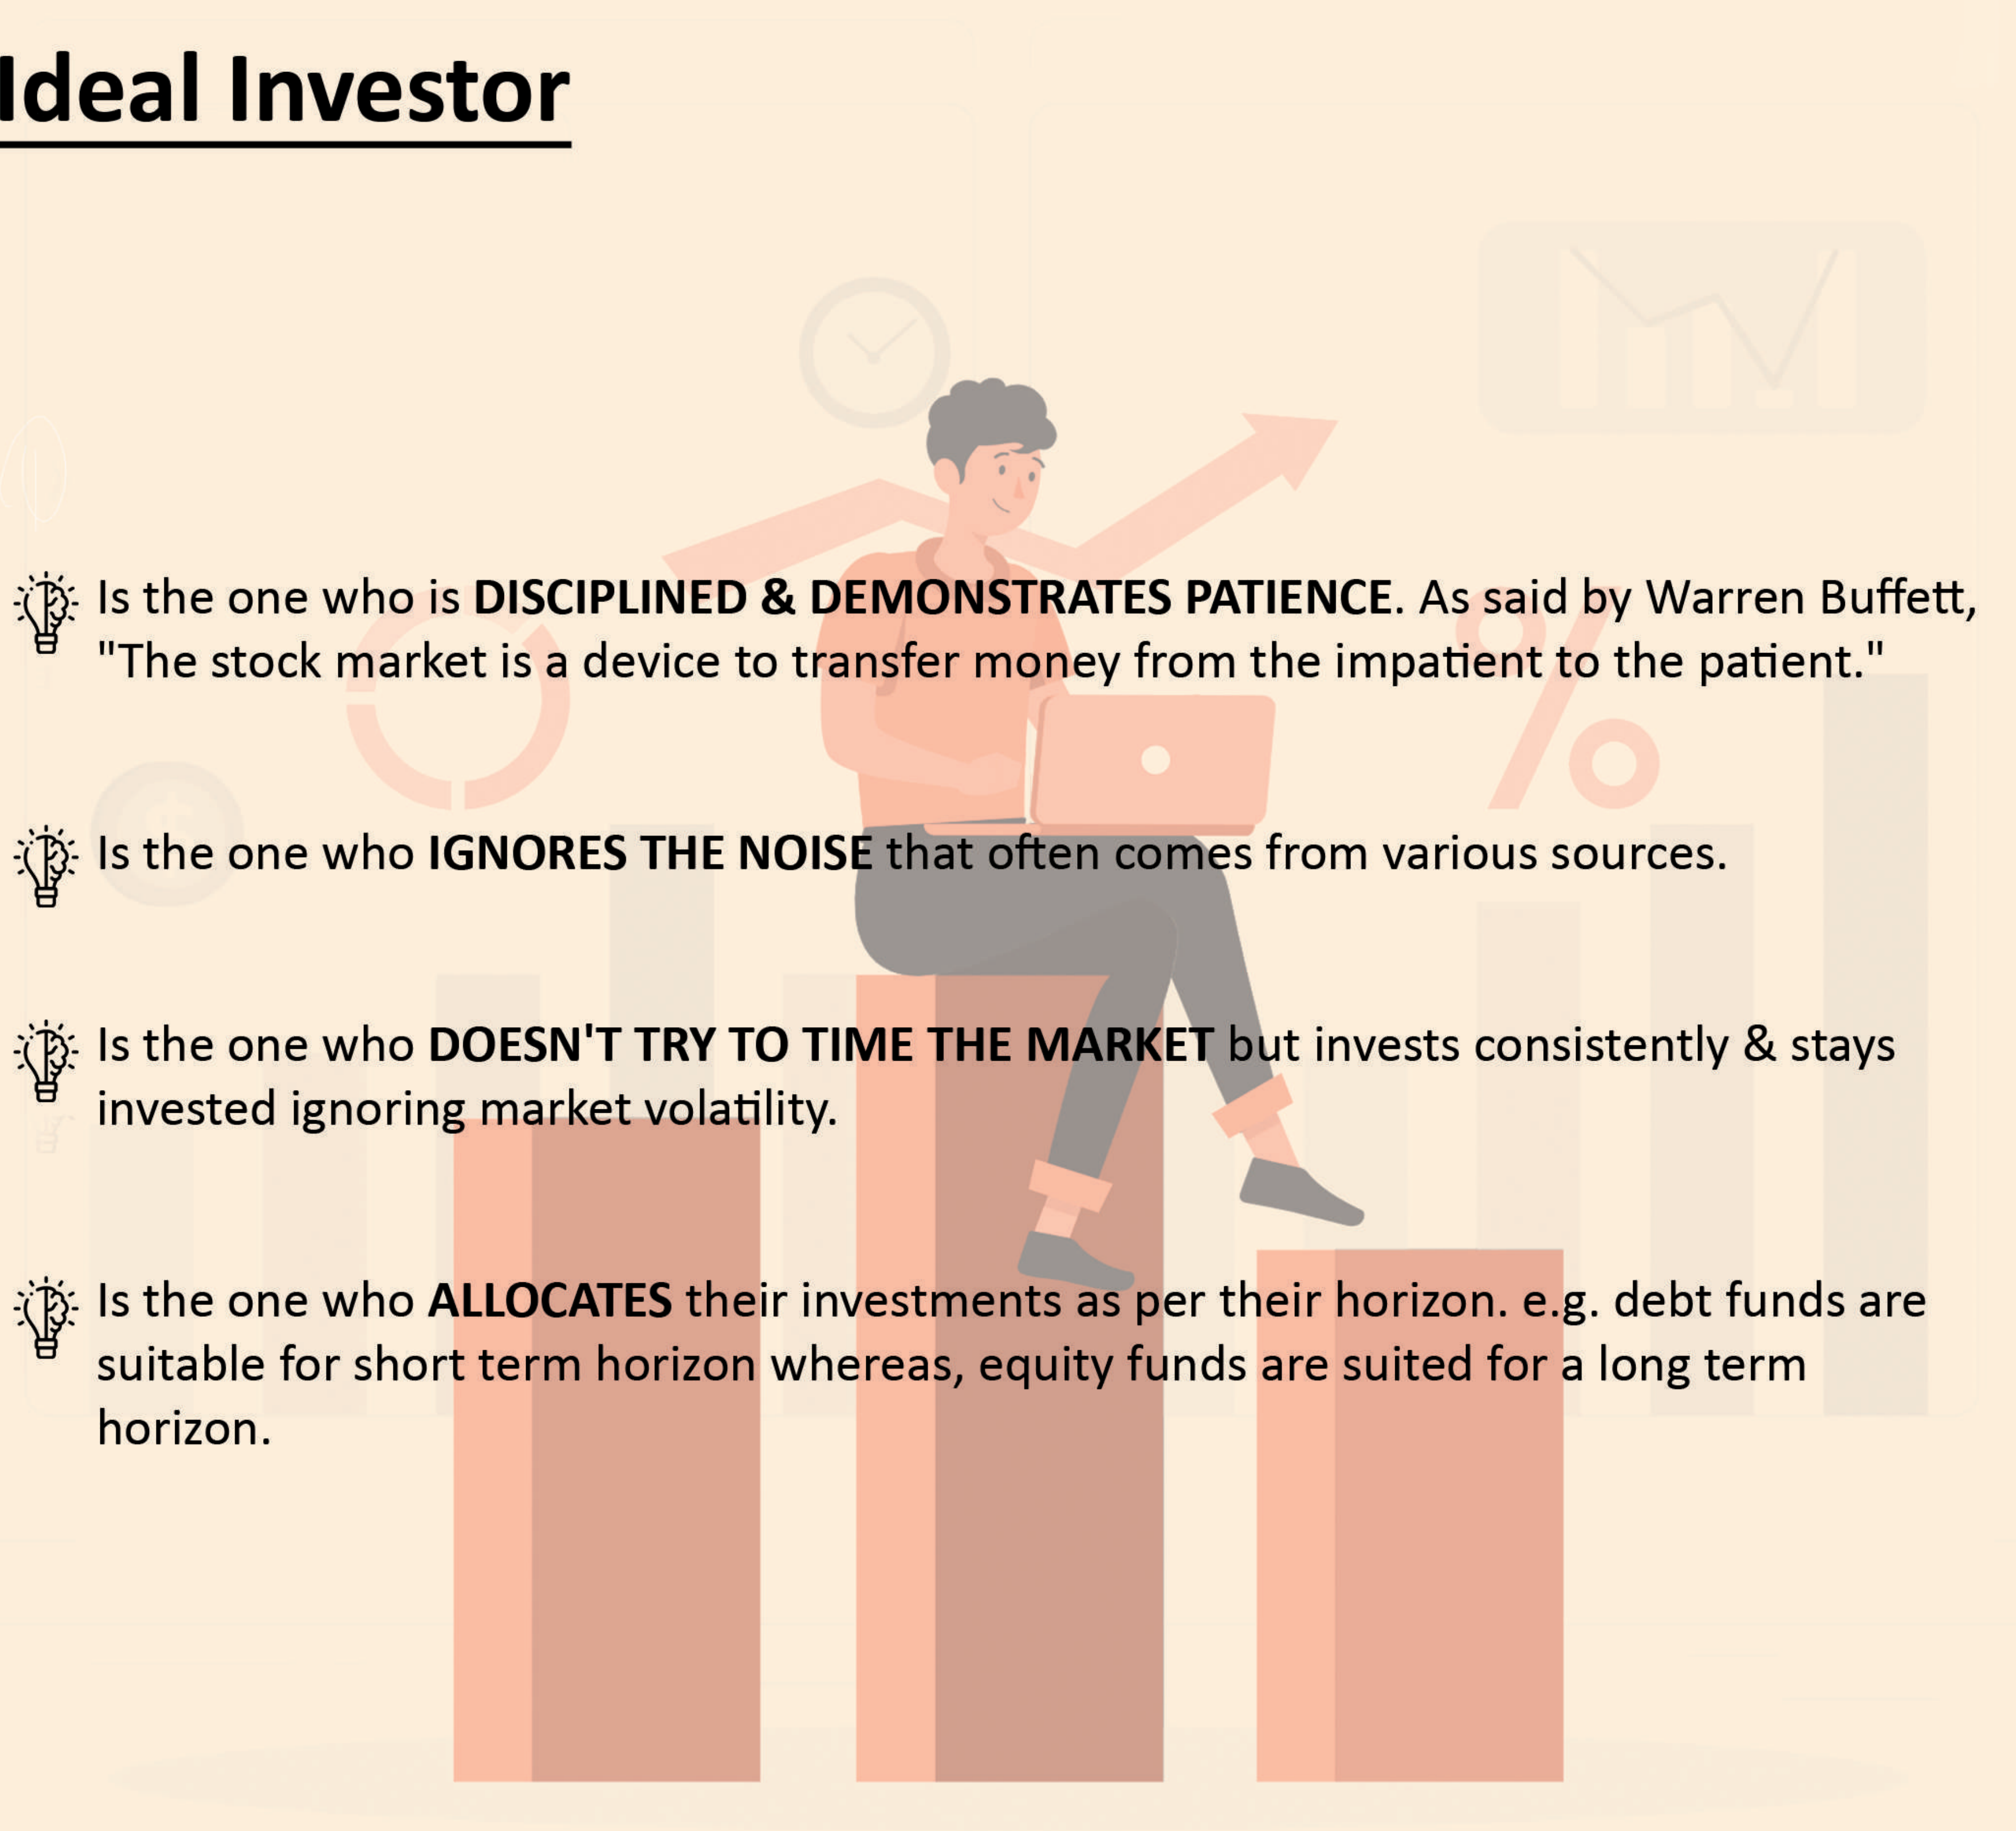

By Starting Early

	Mr. X	Mr. Y
Investment Started Age	25 Years	35 Years
Monthly Investment	₹10,000	₹10,000
Investment done for years	10 Years	25 Years
Investment held till age	60 Years	60 Years
Total Amount Invested	12 Lakhs	30 Lakhs
Corpus at age 60	₹3.95 CR	₹1.90 CR

Mr. X's corpus at age 60 is more than double of Mr. Y despite the investment made by Mr. X being less than half of Mr. Y. The key reason for this is the power of compounding coupled with starting investing early by Mr. X and staying invested for 10 additional years.
